

Adventures in Canine Training, Inc.

Welcome to the Wonderful World of Doggie Ownership!

We want to commend you on your decision to add a canine to your family. There are so many benefits to having a dog as part of your life that we cannot list them here. . . . Now, while this is very rewarding it can also be difficult at times and have its set-backs. However, we are here to help you with your new puppy so that life is easy, fun and rewarding.

Our beliefs about puppies is that they should start with rules, training and guidance from the very beginning—there is no need to wait! This ensures that you do not teach any poor habits but rather prevent anything bad from happening. You can also teach a puppy obedience commands. It's a fallacy that you have to wait for a puppy to be a certain age to start training.

The best part about our programs is that our trainers come to your home! Your puppy does not have to have a certain number of vaccinations to start training with us. We like this aspect of our training because we can start puppies at a young age and help prevent many habits from forming and instead start to form appropriate behaviors and obedience lessons!

Please visit us online or send an email to us so that we can get you started on a puppy program now!
